

LEARN HOW TO MAP FOR EBOLA'S FIRST RESPONDERS

Thursday, November 13th, 6:00 – 8:00 p.m.

Belfer Case Study Room, C020, CGIS Building South

1730 Cambridge St., Harvard University

Seats Limited - Register Here: <http://goo.gl/7BpqMp>

Easy-to-Learn and Then Map on Your Own Time

Contribute Today and MAP FOR HUMANITY!

Volunteer now! Join contributors world-wide and help create the maps which are being used in the fight against Ebola. Easy to make, these maps are for first responders including the World Health Organization, Red Cross, Doctors Without Borders and others

Come and Learn how to map rooftops in cities and the paths and roadways to remote villages using Open Street Map and satellite images. First responders need your help today.

- **Bring a laptop** to do your mapping on. Participants will connect to OpenStreetMap through the Harvard Guest wireless network.
- **You'll learn** about this global collaboration
- **You'll see how to use** OpenStreetMap's humanitarian mapping freeware which is quickly becoming the communication tool used by international first responders

After the workshop: you can easily map from anywhere and on your own time! And, be ready to map for any other disaster.

Join this remarkable opportunity to
contribute and truly make a difference.
