

GPS mapping with the Asus PDA

Click Start > ArcPad 8.0.0

Choose the appropriate map.

Tap the arrow under the GPS button:

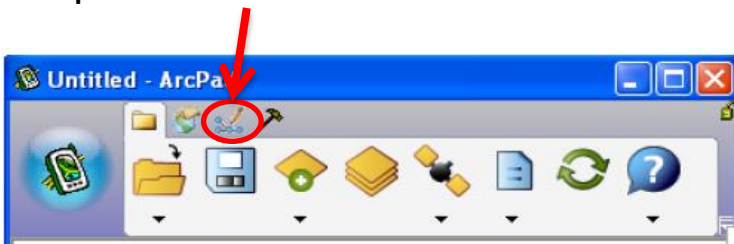

Make sure the "GPS Active" option is checked (when checked it is outlined in a red box).

A red "No Fix" message will appear until the Asus finds the satellite Signals. Once locked into the signals, a green box will appear with the current map coordinates.

To save GPS points:

1) Tap the "Edit" button

2) Tap the "collect GPS point" button

You'll be prompted to type in any NOTES.

Tap OK, and the point is automatically saved.

Click the ArcPad button and Exit to close the map:
