

To record a track on the Garmin Oregon:

First, clear the existing track log:

Turn on the Oregon, and touch the "Track Manager" button (after touching the "scroll to right" button).

Touch: Current Track > Clear Current Track > Yes and the "X" to return to the menu.

Then from the main menu:

Setup > Tracks > and make sure the top choice is set to "Track Log Record, Show on Map"

When finished, save the track:

Track Manager > Current Track > Save Current Track

To save your current position:

From the main menu touch "Mark Waypoint"

To enter a coordinate to navigate to:

Touch: Where To > Coordinates

To download and view your tracks and waypoints:

Connect to computer via USB cable.

GPS will turn on, and your computer will recognize it as "Garmin Oregon" external hard drive and assign a letter to it, for example, "G".

Browse to G:\Garmin\GPX

Waypoint files are saved by date, for example: Waypoints_20-JUN-11.gpx

Open this gpx file in google earth. When prompted to make KML tracks, click "Yes"

Open the file: "Waypoints_<Date>.gpx" in Google Earth.
